

ESET vs. Avast (AVG)

Protection and reliability

SE Labs
www.selabs.uk
 Home Anti-Malware Protection (July-September 2016)

ESET was the only security program within the entire test that detected and blocked 100% of threats. ESET's products are designed with **built-in protection** from the very beginning, and this test result proves that.

Performance

Virus Bulletin
www.virusbulletin.com
 VB100 Comparative Review Windows Server 2012, June 2016

Whether you consider powerful protection more important than minimal performance impact or vice versa, you won't go wrong choosing a product that tops the charts in all areas. **ESET provides well-balanced protection, performance and reliability.**

AV-Comparatives
www.av-comparatives.org
 File Detection Test of Malicious Software, September 2016

When a "false positive" occurs, it **can cause serious problems**. If an antivirus solution is configured to immediately delete or quarantine infected files, a false positive in an essential file can render the operating system or some applications unusable.

AV-TEST
www.av-test.org
 12 Security Suites for Mac OS X Put to the test, July 2016

Faster operation and lower resource consumption mean **better performance**. Test results quickly reveal that the protection from ESET, despite its 100% detection rate, causes little or no burden on systems.

■ ESET ■ Avast (AVG) *Lower is better

Feature	ESET	Avast (AVG)	Why it matters
Protection Client (Mac OS)	●	○	Gone are the days when Mac OS didn't need protection. There is no reason why Mac OS cannot be targeted by cybercriminals. Not only can malware or spyware designed for Mac cause problems, but also malware designed for Windows can enter your network via a Mac and cause damage to PCs in the network.
Apple iOS clients	●	○	Even iPhones or iPads can be used by cybercriminals to commit crimes. If an iOS device is stolen or lost, the administrator can track, remotely wipe or lock/unlock the device. Our iOS client is integrated within ESET Remote Administrator, giving a full overview of network security.
Google Android clients	●	○	Android devices are open to various threats, most of which come from downloaded applications. The operating system, before installation, asks the user what data an app will access, but Android won't block any activity after installation. There is no need for a dedicated mobile device management tool because it is integrated within ESET Remote Administrator.
Device Control	●	○	Malicious insiders frequently use USB drives to quickly steal data or compromise systems, often without organizations being aware of the problem until it's too late. As a result, Device Control is now a critical component of data protection strategies for enterprises.
Which language can be used to contact support	All	English, German	ESET has offices and support centers all around the world, so customers can contact ESET support in local language, which is appreciated by customers.

Tested products: ESET Remote Administrator, ESET Endpoint Security, AVG CloudCare

ESET vs. Avast (AVG)

Awards

VB100 Awards

Virus Bulletin, www.virusbbtn.com, 05/1998 - 12/2016

Since May 1998, ESET has passed every Virus Bulletin VB100 test in which it has participated, except one. Avast did not participate in 12 tests and failed a further 24 times. ESET does not hesitate to prove its quality in public tests.

Total Advanced+ Awards

AV-Comparatives, www.av-comparatives.org, 05/2004 - 12/2016

ESET has been developing its heuristics engine since 1992. This is evident when looking at the amount of awards ESET has won compared to Avast.

■ ESET ■ Avast (AVG)

"The test corpus consisted of 81,796 emails. 73,710 of these were spam, ESET, stood out for missing just four emails from the spam corpus."

Virus Bulletin
VBSpam Comparative Review, September 2016

"ESET received the highest rating in the AV-Comparative File Detection Test and was awarded with the File Detection, Advanced+ Award. The File Detection Test assesses the ability of antivirus programs to detect malicious files on a system."

AV-Comparatives
File Detection Test, March 2016

*"ESET Endpoint Security: The package detected all the malware threats in the test, with almost no burden on the System."
"ESET demonstrated excellent performance when it came to detecting over 11,000 selected Windows malware threats."*

AV-Test
12 Security Suites for Mac OS X Put to the Test, July 2016

"ESET protected against all of the public web-based threats and targeted attacks. It blocked 100 per cent of the threats. This software was also entirely effective when handling legitimate objects, giving it the rare privilege of a 100 per cent overall rating."

SE Labs
IT Security Products for Small Business, July-September 2016

ESET earns 100th VB100 award

"ESET has been a top performer in our tests since 1998, and today we are delighted to present their 100th VB100 award – a first for any single product over the years," said John Hawes, Chief of Operations at Virus Bulletin, *"ESET NOD32's history of excellent performances and zero false positives is a clear indicator of a very well-built, well-maintained and extremely reliable product."*
